PULL EVERYTHING EVERYWHERE!

TESTIMONIALS

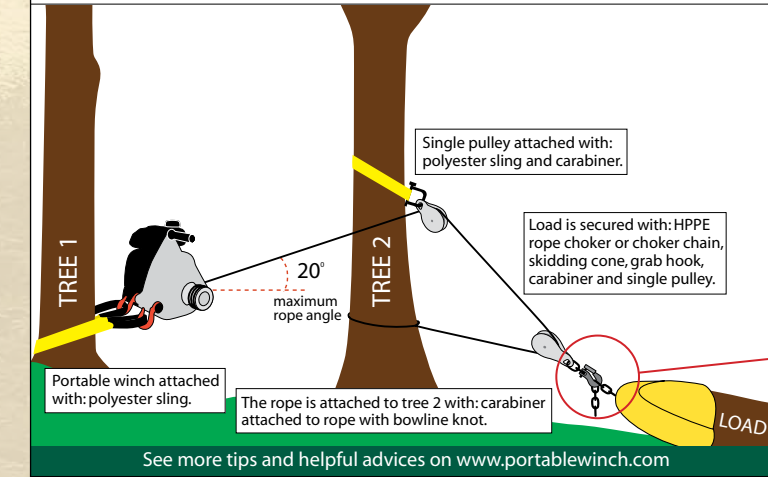

- Yesterday I had my first opportunity to put the winch to serious work. Just wanted to let you know that it was a great success - most impressed with the unit and the accessories.
Pete Kirby, Quebec, CANADA
- I am pleased to tell you we purchased three of your winches, and I wanted to say that we are very pleased with them. They were fantastic for the job in hand. I would highly recommend this product and its versatile usages.
Mike Hartnell, United Kingdom
- Every now and then you get a tool and wonder how you ever lived without it. Really a time and back saver. Thanks.
Pat Spanaus, Timber Tree Service, Wisconsin, USA
- I have been hunting moose and red deer using your winch to get it to the nearest road. I am very, very impressed!
Frode Sjoeborg, NORWAY
- The capstan with the Honda™ engine is like owning a Rolls Royce™. It is a superb setup and I want to thank you for your professional and courteous service.
Richard Anselment, Alaska, USA

PORTABLE CAPSTAN WINCH ADVANTAGES

- Powerful – up to 2 tons of pulling power with snatch block.
- Lightweight - weighs only 16 kg (35 lb).
- Fast - up to 4 times faster than electric winches.
- Quick attach - anchors to any tree, pole, stump or ball hitch.
- Easy to use - anchor it and pull.
- True power - 100% duty cycle (vs 20% duty cycle for electric winches).
- Constant pulling power - standard winches are rated for 1st layer pull.
- Unlimited rope length.
- Safe - no kinks, pig tails, barbs on rope or whiplash using synthetic rope instead of wire rope.
- Reliable - 4-stroke Honda™ engine - 50 cc.

TYPICAL LOG PULLING SET-UP (DOUBLING PULLING POWER)

1. Attach winch to anchor tree with polyester sling.
2. Attach 1st pulley to a tree nearby with sling and carabiner. Position it as high as you can to reduce friction.
3. Install a second pulley at the load.
4. Rope goes from winch thru 1st pulley, then thru 2nd pulley and is attached back to same tree as 1st pulley. The winch's 1 ton of pulling power is now doubled to 2 tons.
